EDUCATION

KIT's College of Engineering, Kolhapur B.Tech. in Computer Science and Engineering (Data Science)	Sep 2021 – July 2025 CGPA: 9.16
Sou. S. M. Lohia Jr. College, Kolhapur Maharashtra Board	Aug 2019 – Aug 2021 HSC: 89.67 %
Sainik English Medium School, Kasba Walve, Kolhapur Maharashtra Board	2007 – Aug 2019 SSC: 90.80 %

TECHNICAL SKILLS

- **Programming Languages:** Core Java, Python, C
- **Web Development:** HTML, CSS, JavaScript, Solidity, SQL(MySQL)
- **Data Science, Machine Learning and Deep Learning:** Data Science (collection, cleansing, visualization, modeling, interpretation), Statistics, Regressive Models, Classification Models, Feature Engineering, NLP, ANN, GenAI

WORK EXPERIENCE

AI Engineer Intern <i>Rapid Technologies</i>	February 2024 - June 2024 <i>Remote (Hyderabad, India)</i>
• Worked on Data cleansing and augmentation, feature selection and development of custom deep learning model for Prediction of Cardiovascular Diseases and Precaution System. • Lead the interns team for development of deep learning model which achieved nearly 97% accuracy . • Worked on research and initial stage development of deep-learning model for segmentation of MRI images using u-net3D to help doctors for precise biopsy. Programmed custom data generator which increased efficiency of machine by 20%. • Technologies: Numpy, Sklearn, Pandas, Tensorflow, Keras, Preprocessing, Data Augmentation.	

PROJECTS

Blockchain based Certificate generation and validation	GitHub <i>Web3</i>
• Developed a Dapp which provide a secure and tamper-proof way to generate and validate digital certificates. This include custom Smart Contract to automate the authenticity management of certificate supported by blockchain. • Technologies: MySQL, HTML, CSS, Solidity, JavaScript, PHP, web3.js	
Design and Development of Deep Learning Architecture for grading of Microscopy Images	GitHub <i>DL</i>
• The project was accomplished with innovative SE-ResNet model for grading of Kidney histopathology images with novel addition of Squeeze and Excitation block (SE) which enhance the feature mapping between the layers of the traditional ResNet. • Dependencies: Tensorflow, keras, Conv2D (CNN), etc.	
IPL match Result Prediction	GitHub <i>Machine Learning</i>
• Developed a Web-App empowered with Machine Learning to calculate the winning probability of both teams based on historical data and real time attributes like home stadium, score, wickets, overs, target, etc. • Technologies: Linear Regression, sklearn, pandas, pickle, streamlit	

ACHIEVEMENTS & CERTIFICATIONS

- Selected by HOD to be part of student team **working on real-time project sponsored by Menon & Menon Ltd.**
- Selected among the **top 3 graduate students per department** from Government of Maharashtra for **Tuition Fee Waiver Scheme in Computer Science and Engineering (Data Science).**
- I was an active member of E-cell KIT, where our team was **finalist for NEC 2023 competition by IIT Bombay.**
- Certification in **AWS Technical Essentials**
- Certification in **Cisco Introduction to Cybersecurity**
